Dear Jialin,

Re: Mr Jialin Yang DOB 06/03/1985
Flat 48 Cromwell House 13 Ron Leighton Way London E6 1EQ

Diagnosis: Metastatic Adenocarcinoma Sigmoid Colon
Moderately differentiated
Synchronous bilobar metastatic disease (no segmental sparing)
Mismatch Repair proficient
RAS / RAF pending

Co-Morbidity: Nil

Family History: Nil significant

Treatment: Plan to start FOLFIRI 08.03.2024

It was a great pleasure meeting you today. We had a thorough discussion about the recent diagnosis and tests. I understand that you are due to start chemotherapy with Irinotecan and 5-Fluorouracil on 08 March. Having reviewed the CT scans and histopathology results I would agree that this treatment is entirely appropriate. Your tumour appears to be mismatch repair proficient which means that immunotherapy would not play a significant role in your treatment. The RAS and RAF status are still pending which may provide an opportunity to add targeted therapies to the FOLFIRI chemotherapy treatment.

I hope you found the consultation today helpful and if there is anything I can help with in the future, please do not hesitate to contact me.

Yours sincerely

(Dictated and signed electronically)
