Dear Vincent

Re: Mr Jailan YANG (DOB 06/03/1985)
Flat 48 Cornwell House, 13 Ron Leighton Way, London E6 1EQ
Telephone: 07856 226910

I saw this gentleman in clinic who I carried out a repeat colonoscopy which identified a slightly puckered area of mucosa in the sigmoid colon measuring not more than 1cm. This was biopsied and histology has demonstrated the presence of residual adenocarcinoma.

The area has been tattooed distally and Jailan will be discussed at the next Colorectal MDT regarding his further treatment. This may involve a synchronous resection with a defunctioning ileostomy.

With kindest regards

Yours sincerely,

Mr Christopher Chan BSc PhD FRCS (Gen Surg)
Consultant General & Colorectal Surgeon
