Professor Marco Gellinger  
Professor in Medical Oncology  
Leaders in Oncology Care  
[gellingerpa@hcahealthcare.co.uk](mailto:gellingerpa@hcahealthcare.co.uk)

Dear Marco,

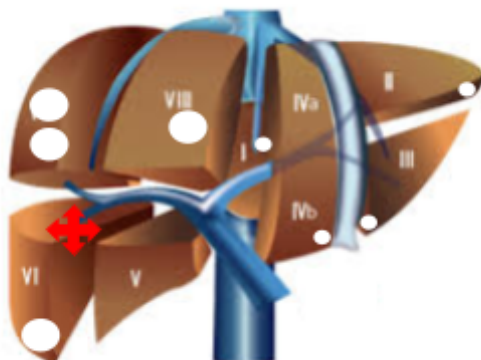

**Patient Name:** Jialin Yang; 06 Mar 1985;  
**Cornell House** 13 Ron Leighton Way, London, E6 1EQ ; [zakkyang@hotmail.com](mailto:zakkyang@hotmail.com)

**Diagnosis:** Multiple liver resections and anterior resection and formation of ileostomy for stage 4 colorectal cancer with liver metastases

**Procedure:**

Multiple liver wedge resections (x8) and microwave liver ablation (x1 central liver ablation)  
J0740 - Multiple liver resections and ablation; J0312 - Liver microwave ablation (Dr Kibriya)  
on 22/07/2024

**Findings:** Segment II, segment III, segment IVb, segment VIII, segment VI, x2 segment VII, caudate lesion anterior to IVC, x1 central lesion in segment VII (next to a branch of right hepatic vein and right posterior portal vein)

**Complications:** nil

**Admission date:** 22/07/2024

**Discharge date:** 31/07/2024

**Venue:** HCA The Harley Street Clinic

**Histology:**

Liver Wedge - Segment 2: Largely necrotic tumour deposit. R0  
Liver Wedge - Segment 3: Largely necrotic tumour deposit. R0  
Liver Wedge - Segment 4B: Partly necrotic tumour deposit. R0  
Liver Wedge - Segment 6: Largely necrotic tumour deposit. R0  
Liver Wedge - Caudate: Largely necrotic tumour deposit. R0  
Liver Wedge - Segment 7.1: Largely necrotic tumour deposit. R0  
Liver Wedge - Segment 7.2: Largely necrotic tumour deposit. R0  
Liver Wedge - Segment 8: Largely necrotic tumour deposit. R0

**Rectal tumour, high-anterior resection:**

**No evidence of residual adenocarcinoma**

**TNM 8th: ypT0 N1c M1a**

**32 lymph nodes: free of tumour**

**Tumour deposits x2 (partial tumour regression)**

**Tumour regression score (primary): TRS0**

**Local excision: complete (R0)**

**Plan:**

- 1) Refer back to Prof Marco Gellinger for the discussion of merit of adjuvant chemotherapy;
- 2) CT Chest abdomen and pelvis prior to oncology appointment on 22/08/2024

I reviewed Jialin back in my specialist liver and pancreas clinic at the London Digestive Centre today.

He is doing very well following his surgery on 22/07/2024. He has been reviewed regularly by the stoma nurse. His ileostomy output has been getting more and more consistent since surgery. He is also managing it very well.

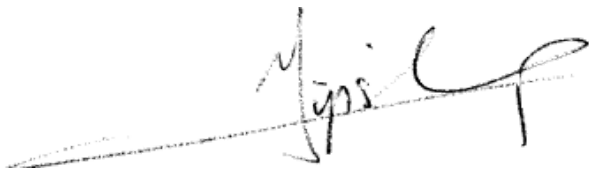

He had a slight wound infection after surgery, but is also recovering very well.

I re-explained to him regarding his histology report. Overall, I explained to Jialin that this is a very positive report for his cancer treatment, in particular the excellent neoadjuvant response from his chemotherapy.

I have organised him for an up-to-date CT chest abdomen and pelvis prior to your review on 22/08/2024, and have asked Dr Kibriya to report the scan.

He is due to be reviewed by Mr Christopher Chan from his colorectal perspective. I have not given him a follow-up appointment with me for now, but am happy to review him in my clinic anytime.

Kind regards,

A handwritten signature in black ink, appearing to read 'Yip', with a long horizontal stroke extending to the left.
